

### You will need:

- craft magnets
- cotton thread
- paper clips
- card
- scissors

### Instructions:

1. Thread a length of cotton through some card tie a knot so it doesn't pull through and fix a paper clip to the loose end
2. With your craft magnets see if you can lift the end of the paper clip without touching it.... the paper clip should float in the air being attracted to the magnets.

(see film clip MagnetClip)

### Other ideas and tips:

- Try out seeing how magnets move a compass. We lined our compass up to North. By moving the craft magnets closer you can see how the needle (see film clip MagnetCompass)
